## **Monthly Harvard-Harris Poll: June 2018**

This survey was conducted online within the United States from June 24-25, 2018 among 1,448 registered voters by The Harris Poll.

The results reflect a nationally representative sample. Results were weighted for age within gender, region, race/ethnicity, marital status, household size, income, employment, political party, political ideology, and education where necessary to align them with their actual proportions in the population. Propensity score weighting was also used to adjust for respondents' propensity to be online.

| The report surfaces politically biased text messages by a handful of FBI employees, including counterintelligence agent Peter Strock, who was responsible for leading the Clinton email probe and opening the Trump-Russia investigation. The report found that the communications, many derogatory of Trump, were "deeply troubling" and "cast a cloud" over the handling of the Clinton email investigation.   | 275<br>19% |

| The report found that the big decisions in the Clinton case were not motivated by political bias. Of the decision not to charge Clinton, the inspector general "found no evidence that the conclusions by the prosecutors were affected by bias or other improper considerations; rather, we determined that they were based on the prosecutors' assessment of the facts, the law and past department practice." | 226<br>16% |

| The report finds that former FBI director James Comey departed from policy and practice by making a public announcement revealing that Clinton would not be charged in the case. It calls Comey "insubordinate" and says the announcement violated protocol and "usurped" the authority of the Attorney General in making it, who should have made the decision on the announcement.                   | 222<br>15% |
| Some of the same agents in the Clinton investigation were also involved in the early months of the FBI's investigation into Russian election interference. Investigators were particularly skeptical of Strzok, saying they couldn't be confident his personal decision to prioritize the Russia investigation over the Clinton probe "was free from bias" because of the nature of his text messages. | 211<br>15% |
| The inspector general singles out an August 2016 text exchange in which Strzok tells Lisa Page, an advisor to deputy-FBI Director Andrew McCabe, "we'll stop" then-candidate   | 202<br>14% |

Trump from being elected.  
The report says the text is  
"not only indicative of a  
biased state of mind  
but, even more seriously,  
implies a willingness to  
take official action to  
impact the presidential  
candidate's electoral  
prospects."
