

HARVARD CAPS HARRIS POLL

Field Dates: July 26-28, 2024

SURVEY METHOD

This survey was conducted online within the United States from **July 26-28, 2024 among 2,196 registered voters** by **The Harris Poll and HarrisX**.

Respondents for this poll are recruited through opt-in, web-panel recruitment sampling. Recruitment occurs through a broad variety of professional, validated respondent panels to expand the sampling frame as wide as possible and minimize the impact of any given panel on recruiting methods.

Results are weighted for age within gender, region, race/ethnicity, marital status, household size, income, employment, education, political party, and political ideology where necessary to align them with their actual proportions in the population. Propensity score weighting was also used to adjust for respondents' propensity to be online. The margin of error for the total sample is +/- 2.1pts.

The poll was supervised by pollsters:

Mark Penn (Chairman, The Harris Poll)

Dritan Nesho (CEO, HarrisX)

Stephen Ansolabehere (Professor and CAPS Director Emeritus, Harvard University)
